## DEBIX Model B Industrial Single Board Computer

### Overview:

DEBIX Model B is a high-performance, industrial-grade single-board computer designed for challenging and demanding applications. It boasts superior features compared to its predecessor, DEBIX Model A, making it a compelling choice for projects operating in extreme temperature conditions.

### Main Features:

- **Wider Operating Temp.:** DEBIX Model B confidently operates in -40°C to 85°C environment. This enhanced resilience makes it ideal for industrial applications with extreme temperatures.
- **Shared DNA with DEBIX Model A:** Both share the same powerful i.MX 8M Plus CPU with 2.3 TOPS NPU and identical PCB design, contributing to their similar appearance. They also offer the same type and number of interfaces.
- **Targeted Upgrade:** Upgrade individual chips and components on the board, it is convenient for customers to choose a board according to the temperatures of their real-world application environment.
- **Powerful Connectivity:** A full suite of connectivity options, including Gigabit network, 2.4GHz & 5GHz Wi-Fi, Bluetooth 5.0, high-speed USB 3.0, and PCIe support.
- **Advanced Multimedia:** Multimedia capabilities are equally impressive, featuring 1080p60 video encode and decode (including H.265 and H.264), 3D/2D graphic acceleration, and advanced audio and voice functionalities.
- **Software Compatibility:** Support Android 11, Yocto-L6.6.36, Ubuntu 22.04, Debian 12 and Windows 10 IoT Enterprise operating systems.
